### Limited space & availabilities

#### Conditions to Apply:

- ✓ NEVER Exhibited at Any CIGRE Event Before
  - ✓ With Less Than 20 Employees
- ✓ Aimed at Marketing a Scalable, Innovative, Technology-Enabled Product / Service in the Field of CIGRE Activities
  - ✓ Comply With the Exhibitor's Rules on <https://www.cigre-exhibition.com/form/cgv>
    - ✓ Only Small Devices & Products for display

**Your registration is confirmed only after you get approval from Pro4events**

Paris  
Session 2026

Updated on 30 January, 2026

Sunday 23 August > Friday 28 August, 2026  
VENUE : Palais des Congrès, Porte Maillot, Paris (VIPARIS)

## Please, transfer the following technical regulations to your stand contractor

### GENERAL INFORMATION

Safety rules regarding risks of fire and panic in establishments open to the public have been established by the Order dated June 25<sup>th</sup>, 1980 (general provisions). The Order dated November 18<sup>th</sup>, 1987, sets forth the specific provisions applicable to exhibition halls. The text below is excerpted from said regulations in order to facilitate understanding.

The Safety board is quite severe regarding stand construction (stability, construction and decoration materials, electrical installations, etc...). The decisions made during safety board inspections, the day before of the morning the event opens must be immediately implemented. Stand installation must be completed for Safety board inspections.

The Exhibitor (or his representative) must be present at the stand and be prepared to provide flammability reports for all materials used. Non-compliance with this rule may lead to the removal of such materials or a prohibition on opening the stand to the public. All large projects (Basic stands = construction on raw space) must be submitted to the trade show's safety Supervision for approval.

### A. STAND CONSTRUCTION RULES

**Stand drawings :** After registration, each Exhibition Manager will receive a private mail from the organiser Pro4events with the space and dimensions of the location booked > for any question, contact : [marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com)

Please, note :

> the size of a few locations (not all locations are concerned) may change slightly after a last SECURITY CHECK of the floor plan with a difference of + or – 20% as compared to the surface initially booked.

> the position of the pillars is not accurate (+/- 30 cm)

You can take advantage of the pillars on the stand to increase visibility > see our post cladding offer

> contact : [marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com)

#### **ALL STAND PROJECT**

or additional building to the shell-stand (formule plus or premium)

**are to be sent to the organiser Pro4events for approval BEFORE 15 April, 2026**

Send a mail to : [stand-approval@pro4events.com](mailto:stand-approval@pro4events.com) / Adil EL HOUMANI <[adil.regie@gmail.com](mailto:adil.regie@gmail.com)>

[copy to marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com)

Stand builders must ask the Exhibition Manager

#### **Height of booth construction & signs :**

The maximum height authorised for any construction in alignment with the gangways and next stands is fixed at **2.50 m** (platform included).

The maximum height for signs and construction is **3.00 m** with a distance of 1.00 m back from the next stands and from the gangways. Exemptions for signs may be granted on request.

There are different heights in the hall > please check on the floor plan and contact the organiser Pro4events for a **FINAL APPROVAL**  
> [marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com) & [stand-approval@pro4events.com](mailto:stand-approval@pro4events.com) / Adil EL HOUMANI <[adil.regie@gmail.com](mailto:adil.regie@gmail.com)>

**Suspension from the framework** : The Palais des Congrès (VIPARIS) is the ONLY company allowed to install slings > [CLICK HERE for more information](#)

**Partition walls** : no more than 50 % of the total length along the gangways.

**Platform or raised floor** : in case exhibitors want to raise the floor, an access ramp is required.

**Signs** : illuminated signs are allowed. In no case, they may be intermittent or flashing. White letters on a green background are forbidden.

**Noise level** : the maximum allowed level of noise for advertising is 75 dB (at one meter from the ground).

**Maximum load** : Any exhibitor displaying elements or structures built with a total weight of more than 500 kg must send to the organizer ([marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com) & [stand-approval@pro4events.com](mailto:stand-approval@pro4events.com)), at the latest 3 months before the exhibition, a file of presentation with a certificate certifying that the distribution of the load on the ground of the together is less than 500 kg / square meter. During assembly and in case of doubt the intervention of an approved controller will be required and the following costs billed to the exhibitor.

**Overhead coverings** (ceiling, false ceiling, solid canopy) and awnings are allowed with restrictions & limitations and ONLY if authorised by the organiser and the venue  
> you have to submit your project to [marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com) & [stand-approval@pro4events.com](mailto:stand-approval@pro4events.com) / for advise and final agreement.

#### **What is prohibited :**

- Elevated floor stands (raised floor is allowed)
- Borings into the ground
- Curtains, drapes and net curtains in front of exits,
- Paint and varnish classified as inflammable (nitrocellulose or glycerophthalic for example),
- Use of sign or advertisement panels in white letters on a green background,
- stands with more than 1 level
- Closed stands or rooms (in case, you have an exceptional authorization from the organiser, you have to submit your project to [marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com) & [stand-approval@pro4events.com](mailto:stand-approval@pro4events.com) for final agreement).

#### **Number and width of exits :**

If S is < 19 sq.m: 1 of 0.90m

20 sq.m ≤ S < 50 sq.m: 1 x 0,90m and 1 x 0,60m

50 sq.m ≤ S < 100 sq.m: 2 x 0,90m or 1 de 1,40m and 1 x 0,60m

100 sq.m ≤ S < 200 sq.m: 1 x 1,40m and 1 x 0,90m or 3 x 0,90m

200 sq.m ≤ S < 300 sq.m: 2 x 1,40m

S > 300 sq.m, Exits should be carefully positioned and marked (S = surface)

If any question, please contact HERVE PIERRE SAS / Mr. Charles JARDINIER / 2 rue Maurice UTRILLO / 95110 SANNOIS /

e-mail : [anthony@hervepierre.com](mailto:anthony@hervepierre.com).

#### **Accessibility for persons of reduced mobility (PRM)**

The Exhibitor must comply with French regulations and with the accessibility order. These regulations specify that all premises and facilities open to the public must allow access to the disabled and to people with reduced mobility. This means that one or several ramps, of a minimum width of 90 cm, will facilitate access. Slopes will respect the following percentages:

- 4 % slope without limit to the length of the passageway
- 5 % slope on a length of less than 10m
- 8 % slope on a length of less than 2m
- 10 % slope on a length of less than 0.5m
- 33% slope for a threshold of 4 cm (ie a depth of 12 cm for a floor height 4 cm)

Clearance of a radius of 1.5 m will be left free for manoeuvring at each end of the ramp.

Welcome and information desks must be accessible to people using a wheelchair: height 80 cm, a gap of 30 cm depth on a height of 70 cm, enabling space for knees.

Width of 1.4 m minimum for pathways.

Ramps with minimum width of 90 cm are requested.

PRO4EVENTS reserves the right to have any stand, not respecting the General Regulations, modified by a company of his choice, and at the Exhibitor's own expense.

## **B. FIRE SAFETY RULES**

Fire and panic risk prevention regulations establishments frequented by the public are specified in the Ministerial Order dated 25 June 1980 (general provision). The ministerial Order dated 18 November 1987 stipulates the special measures applicable to exhibition halls. The text below is composed of extracts from these regulations in order to facilitate comprehension.

Any information concerning fire safety can be obtained before the Event from: **HERVE PIERRE SAS / Mr. Charles JARDINIER / 2 rue Maurice UTRILLO / 95110 SANNOIS / e-mail : anthony@hervepierre.com**

During the setting-up period, Mr Anthony Landais will ensure that all security measures indicated here are applied.

### **Materials :**

The materials used must comply with fire reaction characteristics. They are classified into 5 categories M0, M1, M2, M3, and M4 (M0 corresponds to an incombustible material).

### **Requirements :**

- Stand framework and partitions classified **M3** as a minimum,
- Large pieces of furniture (boxes, counters, presentation cases, screening, etc.) classified **M3** as a minimum,
- Wall coverings (natural or plastic fabrics) classified **M2** as a minimum (they may be stretched or fixed with staples; Sundry finishes (fabrics, paper, plastic film) which are very thin (1 mm maximum) may be used when fixed in a full bed of adhesive to backgrounds of M0, M1 M2 or M3 materials. Embossed or textured paper, however, must be fixed in a full bed of adhesive onto M0 materials only),
- Materials on display : Materials on display may be shown on the stands without any requirements for fire resistance. However, if those materials are used for decorating the partitions of false ceilings, and if they represent more than 20 % of the total area of these elements, the requirements in the above paragraphs shall be applicable to them,
- Floral decoration : Limited use should be made of floral decorations in synthetic materials. If this is not the case, these decorations must be made from **M2** materials,
- Curtains, drapes and loose net curtains classified **M2** as a minimum (They are forbidden on entrances and exits to the stands, but permitted on doors to internal rooms),
- Paints & varnishes : strictly forbidden if they are deemed to be inflammable (based on nitro-cellulose or alkyds for example),
- Floor covering must be firmly fixed, classified **M4** as a minimum,
- Covering for podium, platforms or tiered seating (if > 0,30 m and if S> 20 sq.m.) classified **M3** as a minimum (h = height, S = surface),
- Floating decorative elements or trims (advertisement panel if S > 0,50 sq.m., garlands, light decorative objects, etc.), classified **M1** as a minimum (the use of signs or advertising panels using white letters on a green background is strictly forbidden, as the colours are reserved exclusively for indicating exits and emergency exits),
- Canopies, if building fitted with sprinklers, classified **M2** as a minimum, otherwise **M1**, CNPP-approved mesh canopies. (CNPP – French Test Laboratory).

### **Equivalences for wood :**

- Non-resinous solid wood : if thickness  $\geq 14$  mm, classified **M3**,
- Resinous solid wood : if thickness  $\geq 18$  mm, classified **M3**,
- Panels made from wood derivatives (plywood, boards, wood fibres, chipboard) : if thickness  $\geq 18$  mm, must be classified **M3**.

## Fire classification

Classes selon NF EN 13501-1 (hors sol)				classes selon NF EN 13501-1 (hors sol)			
A1	-	-	Incombustible	C	s1		M2
A2	s1	d0	M0		s2	d0	
A2	s1	d1	M1		s3	d1	
A2	s2	d0	M1	D	s1		M3
	s3	d1			s2	d0	M4
					s3	d1	non goutant
B	s1			E-d2 à F			M4
	s2	d0		SOL			
	s3	d1					
C	s1		M2	Bfl	s1		M4
	s2	d0			s2		
	s3	d1					

## Fire certificates

At any time, the Security Manager may request exhibitors the official report giving the fire classification of materials used in stand construction or failing this, the equivalent fireproofing certificates. All coatings, coverings and material meeting the requirements of security are sold in specialized shops, where the quality certificates as regards the classification of fire resistance may be obtained from the :  
Groupement NON FEU / 37-39, rue de Neuilly BP 121 / 92113 Clichy Cedex / Tel. 01 47 56 30 80

## Fireproofing certificates

By means of different procedures or applications, any material which normally would be of medium or high flammability, may obtain the flame resisting qualification of M2. These procedures would be: inflammable liquid spraying, brush application of a paint or special varnish or immersion in a special bath solution. These operations of fireproofing may be performed by an officially qualified person or contracting company who may issue a homologated certificate giving the following specifications. The exact names, addresses and telephones may be obtained from the :

Groupement Technique Français de l'ignifugation / 10, rue du Débarcadère / 75852 Paris cedex 17 / Tel. 01 40 55 13 13  
Reports of foreign origin cannot be taken into consideration. Only reports issued by approved French laboratories can be accepted.

## Exhibitors obligations

Exhibitors must keep on their stands the official report giving the fire classification of materials used in stand construction, (failing this, the equivalent fireproofing certificates).

It shall be strictly forbidden to set any type of fitting out whatsoever over the aisles (structure of signboards, walkway, etc).

## C. POWER SUPPLY & ELECTRICAL INSTALLATION

Exhibitors need to order power supply for the stand > choose to order the "Ready to Exhibit package" (Electricity + Furniture + (or) TV Led screens) = 1 supplier / 1 invoice, all in one & customized service managed by Pro4events ([order form click here](#)) > contact [marion.caumont@pro4events.com](mailto:marion.caumont@pro4events.com) or order on VIPARIS Store <https://www.viparisstore.com/en/cigre-2026>

### Electrical installation (by VIPARIS) :

- Electrical connections must be made inside connecting boxes,
- The electrical cut-off devices must be permanently accessible to the staff on the stand,
- The installations must only have fixed wiring systems,
- Cables and conductors must be category C2,
- Ducts and rails used to route cable, and cable covers must be flame-resistant, in compliance with the current standards,
- All wiring systems must have a protection conductor connected to the earth terminal on the electricity supply panel,
- If class 0 materials exhibited are powered up, they must be protected by residual current mechanisms set a maximum of 30 mA,
- Class 1 appliances must be connected to the protective conductor of the wiring system supplying the power,
- the use of individual protected earth sockets is prohibited.

Electricity junction boxes and supply panel cupboards: These must be in a metal casing, inaccessible to the public, easily by staff and fires services, sited away from all flammable and combustible materials and products.

### IMPORTANT : if the power supply is more than 100 kVA

- The supply panel must be in a cupboard dedicated solely to this use,
  - The location must be signed,
  - A CO2 or powder extinguisher must be adjacent,
  - Partitions must be classified M3,
  - The supply panel must not located under a mezzanine floor accessible to the public,
- A declaration is required if the power supply exceeds 100 kVA.

### **Halogen lamps (EN 60598 standard)** Halogen stand lighting must :

- be fixed at a minimum height of 2,25 m,
- be kept away from any flammable materials (at least in 0,50 metres from wood and other decorative materials),
- be firmly fixed,
- be fitted with a safety screen (glass or fine mesh grill) to provide protection from a possible explosion of the lamp.

### **High-voltage illuminated signs** These must :

- be protected by a screen made of a material in class M3 at least. The switch to turn them off shall be indicated and the transformers shall be placed in a position that cannot cause any danger,
- have a clearly-labelled "off" switch,
- have transformers out of people's reach,
- have "danger, high voltage" notices as required.

### **PROHIBITED EQUIPMENT, PRODUCT, GASES :**

- Multiple sockets and adaptors are prohibited. Only connecting boxes shall be permitted,
- The distribution of samples or products containing an inflammable gas,
- Balloons inflated with a flammable or toxic gas,
- Articles made of celluloid,
- The presence of pyrotechnic or explosives devices,
- The presence of ethyl oxide, carbon sulphide, sulphuric ether and acetone,
- The use of acetylene, oxygen, hydrogen or equivalent high-risk gases. Note: a request for dispensation can be submitted to the French administration,
- Pyrotechnic effects, devices producing detonations, sparks or flames,
- Use of flammable liquids is prohibited inside the Venue VIPARIS but for exceptional use, ONLY after authorisation, it must be limited to the following quantities per stand : 10 litres of flammable liquids of 2nd category for 10 m<sup>2</sup> of stand, with a maximum of 80 litres, 5 litres of flammable liquids of 1st category.

### **EMERGENCY RESSOURCES**

- These must remain permanently visible and reachable
- If there is a fire hose point (RIA) on the stand, a one-meter wide passage from the aisle must be provided to give permanent access. Signs must be visible.

### **OPERATING INSTRUCTIONS**

- It is prohibited to deposit boxes or stock cases, wood, straw, cardboard, etc... in the Exhibition halls, on the stands or in the aisles. Emergency equipment must remain visible at all times. Daily cleaning is necessary to clear the premises of rubbish of all kinds.

## **D. SANITARY MEASURES**

The venue, VIPARIS, has been accredited with the label « **Safe V Events** » from an independent authority.

All the necessary health measures are taken to ensure the highest standards during the Session :

- > **Disinfection** of rooms, common areas, surfaces, equipment, lifts at all times, hand sanitiser available, air recycling,
- > **Medical Center** with dedicated medical staff on level 3 (room 335).

## **E. SECURITY**

To ensure your safety during your stay at the venue VIPARIS, we have increased the number of agents during the Session, in addition to webcams. **BE AWARE that it will take longer to access the Session. Security check is required before entering the Congress Center.**

Please be reminded that the venue is a NON-SMOKING building. The consumption of alcohol is strictly forbidden and during the set up and dismantling of events.

## **F. DELIVERY OF GOODS**

The venue, VIPARIS, is requesting registration of vehicles prior to the delivery on <https://logipass.viparis.com/en>

THE OFFICIAL TRANSPORT COMPANY IS DB SCHENKER [www.dbschenker.com/fr](http://www.dbschenker.com/fr)

# RIGGING STRUCTURES

suspension (hanging) points

ORDER FROM VIPARIS

The Palais des Congrès (VIPARIS) is the **ONLY** company allowed to install slings.

**Maximum weight by hanging point : 5 kg**

Obligation of a point all the 1m – 1m50 according on the signage to hang

**Maximal size for suspended signage : 5 m**

If your signage is longer than 5 m, it necessarily has to have a grip on the ground.

Materials authorized for your structure: Drop, cover, fine PVC (above 4 mm) or wood against plated.

To be validated your request must be necessarily accompanied by a plan with its orientation in the hall or the space + a rise and/or seen in prospect (perspective).

The delivered service includes exclusively the hanging point. The catcher of the structure must be made by the exhibitor or the decorator of the pit.

Any hanging point in the ceilings of the Palais des Congrès de Paris has to be the object of an estimate.

Price for each hanging point should be **130,91 euros** (Excl. VAT) – this price includes only the installation of the hanging point > For more information and quotation, please, contact VIPARIS.

# GENERAL SECURITY

**Security** : From SUNDAY 23 August to FRIDAY 28 August, each attendee will be checked by SECURITY at level 0 (street level)

## EXPECT LONGER DELAYS TO ACCESS THE SESSION

To ensure security during your stay at the Palais des Congrès in Paris, we have increased the number of agents during the Session, in addition to webcams.

Recommendations :

- . Avoid bringing suitcases to the Session: we have reduced the size of storage,
- . Remember to collect your items at the cloakroom on the same day during opening hours,
- . Security agents will apply the access control policy, kindly follow their instructions,
- . Report all suspicious objects or behaviour to security agents or to the police,
- . Do not accept to keep any item for someone else,
- . Do not allow items to pile up (cardboard boxes, pallets, bags etc.),
- . In case of emergency – call the police on **17** (or 197).

*Security is a collective responsibility. We thank you in advance for your help and understanding.*

**Safety measures:** Health and safety are our TOP priority. The venue, VIPARIS, has been accredited with the label « **Safe V Events** » from an independent authority.

All the necessary health measures are taken to ensure the highest standards during the Session : **Disinfection** of rooms, common areas, surfaces, equipment, lifts at all times, hand sanitiser available, air recycling, **Medical Center** with dedicated medical staff on level 3 (room 335).

**Environment** : with our partners, we aim at reducing our environmental footprint and sharing best practices.

### RECYCLING CENTER for Waste Reduction on LEVEL 0

Drop your badges, lanyards, papers for recycling once you have finished your visit at the Conference & exhibition.  
Drop your bags to be reused for future events.

Note that it is required to wear your personal badge during all the time of your visit, as many days as necessary. Don't drop it before ! your badge will not be re-printed.

## RECYCLING – REUSE CENTER

### For Waste reduction

As part of CIGRE's sustainability initiatives, a Recycling Center will be available during the Congress.

On the very last day of your visit, you may want to drop your papers, badges, lanyards in the recycling box on level 0. \*

Participation in this initiative is entirely optional and contributes to CIGRE's commitment to environmental responsibility.

\*your badge will be printed only 1 time for the duration of your visit. Please, keep it with you all along your stay.
